

## Family Fun

We recently welcomed a family of five to the shores of Denis Private Island. Staying in the Family Cottage, offering a separate bedroom for parents and 3 single beds for the girls, the whole family was excited to discover the island.

Our team put an exciting itinerary in place for them to ensure they made the most during their trip. Shortly after settling into their cottage the three young girls were treated to make-up of glitters and sparkles applied by our Resident Spa Therapist. She also creatively designed butterflies and flowers to ensure they made a special entrance for their first evening on Denis Island.

The following day entailed making "Island Style" jewellery, using shells and coral, or anything they could find around the island. Wandering around allowed them to discover exotic pieces to add to their collection. The afternoon was the sweetest of them all; the youngsters were invited to decorate cupcakes and cookies. With their toes in the sand, they spent the afternoon designing some outstanding creations that were later devoured with delight!

After a series of activities throughout their stay, their last day brought on an elaborate and adventurous treasure hunt that took them all the way around the island. Following intricate and fun-filled clues from Toby the tortoise, to the lighthouse and across the airstrip to the cemetery, a well-deserving treasure was found and enjoyed by the whole family!
